

School Curriculum

At St Mary's Catholic First School, our curriculum is designed to meet the diverse needs of our children whilst having an outward facing approach. With the Gospel Values running through the heart of the design, the children are positioned centrally so that they can see themselves within the units of learning; gaining a sense of being part of something bigger. Having the children's positionality embedded within the curriculum, enables our children to live out the Gospel Values; with an understanding of global as well as local connection and responsibility. Being members of an Eco school also enables our children to become part of a drive to look after the world they live in and to understand their own significance, no matter how young.

Please see within our curriculum tab, further details on each curriculum area.
