THREADWORMS!

19th September 2017

Dear Parents

We have been informed of a case of Threadworms.

Threadworms **are extremely contagious** and spread very quickly. They are common and can affect people of any age.

Threadworms are tiny white worms that live in the bowel. There are treatments available and the whole family must be treated at the same time, even if other family members have no symptoms.

Please contact the Children's Health Adviser if you need further help or advice (01305 255215) or your local GP.

Thank you.
